John S. Kloppenborg gives a detailed analysis of one of the most difficult of Jesus' parables, the Parable of the Tenants (Mark 12:1-12; Gospel of Thomas 65). He examines the ways in which Christians have typically read and misread the parable and places the parable firmly in the context of the practices of ancient viticulture. The author models a new approach to the interpretation of the parables of Jesus: first he critically engages the history of interpretation of the text, inquiring into the ideological interests that the parable has engaged during the history of its use in Christian churches and in political discourse; second he reconstructs the social world in which the parable was first told, in particular the economic, social, and legal aspects of ancient viticulture. He demonstrates that the Parable of the Tenants has mostly been interpreted from the standpoint of those who wield social and political power, a strange irony considering the social status of Jesus of Nazareth and the literary uses of the parable. All of the features common to the parable as it is told by Mark and the Gospel of Thomas make it a perfectly realistic story. It is only Mark's editing of the story that takes it beyond the realistic idiom characteristic of Jesus' other parables. The book concludes with a dossier of 58 papyrus documents relating to various aspects of viticulture and agrarian conflict. It was awarded the 2007 Francis W. Beare Book Award by the Canadian Society of Biblical Studies.

Peasants slowly restore land to its fertile state and return to normal life in a grape-growing village of post-war Europe.

This new edition of the standard work, The Englishman's Hebrew Concordance of the Old Testament, is an improved and corrected edition that features a new, larger format now coded to Strong's. It is invaluable in Bible study for those who do not know Hebrew. A new index of Old Testament sequence, Strong's numbers, allows the reader to quickly and easily locate any word by its Strong's number. The Hebrew and English indexes have been retained.
